1. (S-SS) Statistics: Viewer: 018
Session date: 17 JUN 88
Start time: 1201
End time: 1301
Mode of operation: SOLO
PI: None
AV: Dogs

2. (S-SS) Cuing: 6 digit encrypted coordinates:
641501/880782.

3. (S-SS) Tasking: Access and describe the overall purpose, function, principal activities, and overhead site plan of target call [REDACTED] at the above coordinates.

4. (S-SS) Results:

a. The area consists of a fenced-in structure. The fenced in area is mainly square, with a irregularity off to one side (see sketch, pages 5 & 6). The fence appears to be very close to the structure. The area inside the fence is grassed, and appears to be cared for better than the area outside the fence. There are guards present at the fence.

b. The structure is a low, wide "house-looking" building, at least the front of which has windows. These windows appear to be covered with piled up, trashy-looking cardboard, so that one cannot see into them.

c. No specific "purpose" was perceived for this structure, but random perceptions of "intelligence", "research", "testing", "junk storage".
